

RAGHAV SINGHAL

B.Tech CSDS Student @ Rishihood University | AI & Robotics Enthusiast | Future Founder

 Mathura, Uttar Pradesh, India  raghavsinghal1801@gmail.com  [linkedin.com/in/raghav-singhal18](https://www.linkedin.com/in/raghav-singhal18)  github.com/Rsinghal1801

PROFESSIONAL SUMMARY

An ambitious, hands-on engineering student and future founder with a proven track record of designing and building complex physical systems—including autonomous cars and quadcopters—independently prior to university entry. A state-medalist athlete who channels competitive calm, precision, and relentless focus into merging advanced hardware engineering with cutting-edge Artificial Intelligence. Eager to collaborate with forward-thinking builders and build impactful solutions in the AI and intelligent robotics domain.

EDUCATION

Rishihood University May 2026 – July 2030
Bachelor of Technology (B.Tech) in Computer Science & Data Science

- Core Focus: Deepening knowledge in C++, Python, and Machine Learning to seamlessly merge robust robotic hardware with cognitive intelligence.
- Academic Trajectory: Tailoring engineering studies to design foundational architectures for scalable autonomous agents.

KEY TECHNICAL PROJECTS

Autonomous Vehicle Prototype Pre-University
Independent Hardware & Software Integration

- Engineered a fully functional autonomous vehicle prototype prior to beginning formal undergraduate studies.
- Implemented full-stack hardware-to-software integration to coordinate spatial positioning, environment sensing, and core mobility.
- Currently scaling the decision-making pipeline using advanced Python libraries and foundational machine learning models to improve self-navigation logic.

Custom Quadcopters & Robotics Systems Pre-University
Independent Hardware Architecture

- Designed, assembled, and calibrated high-performance quadcopters and embedded mechanical systems from scratch.
- Programmed onboard flight controllers, balanced flight dynamics, and managed electrical power distribution networks.

- Optimized structural frame layouts to maximize durability and payload capability for future sensor integrations.

TECHNICAL SKILLS

Core Programming:	Python, C++, JavaScript
Web Technologies:	HTML5, CSS3, Web Basics
Specialized Domains:	Artificial Intelligence, Machine Learning, Data Science, Intelligent Robotics, Embedded Systems
Hardware Competency:	Autonomous Car Architecture, Quadcopter Design, Mechanical Assembly, System Calibration

AWARDS & ACCOMPLISHMENTS

State Archery Championship 2022 – 2023
State-Level Medalist

- Awarded the **Silver Medal (2022)** and **Bronze Medal (2023)** in highly competitive state archery environments.
- Cultivated elite physical precision, high-pressure emotional control, and steady composure that translates directly into engineering execution and complex debugging under stress.
